San Francisco, CA

## Technical Skills

*Programming:* Python 3, JavaScript ES6+, SQL, CSS, HTML5

*System Design:* Monoliths, Microservices, Domain-Driven Design, Message passing, Event sourcing

*Back-End:* PostgreSQL, Django 4, RESTful API, FastAPI, MongoDB

*Front-End:* React, DOM Manipulation, React Hooks, Redux Toolkit

## Application Development Experience

**Clone BnB** *connecting homeowners with short-term vacation renters* 2023

- Worked under an extremely limited timeline of two days and completed a minimum viable product
- Designed models to accommodate foreign keys for rental property creation and amenities
- Implemented a backend user authentication system with front end user sign up and login forms

**Car Car** *dealership inventory management for sales and service* 2023

- Created poller to receive dynamic inventory data into a sales microservice for vehicle information
- Implemented state management for consideration of form data to be cleared upon submission
- Applied frontend form creation and list views to save and display to the backend database

**Conference GO** *platform for organizing conference attendees, events, and planning* 2023

- Implemented APIs to gather weather data and photos for corresponding conference locations
- Refactored outdated components to support RESTful conventions that dynamically update
- Updated source code to support error-handling with the use of HTTP response status codes

## Professional Experience

**JP Morgan** - Private Client Banker, On-Duty Manager - Union City, CA 2017-2022

- Obtained FINRA Series 6, 63, California Life Insurance License, and Notary Commision
- Specialized in needs of high net-worth individuals by analyzing complete financial profile
- Worked closely with home lending advisors and investment advisors for wealth preservation

**Chase Bank** - Lead Associate of Operations - Sunnyvale, CA 2015-2017

- Supervised and trained bankers and tellers on new policy updates in relation to new regulations
- Worked alongside Branch Managers to plan monthly scheduling, accommodating for client traffic
- Managed branch cash levels while accommodating for client needs and mitigating risk factor

## Education

**Hack Reactor**, *Software Engineering Immersive* 2023

**Mimo Dev**, *Web Development Certificate of Achievement* 2022

**Mission College**, *Studied Business Administration* 2016-2018

Over 250 hours of coding algorithms, constructing sequences for problem solving, and data manipulation
